

Behind the GIFs

with Kat Swenski

Welcome to
Mechanical
Labs!

Where animals
are our
"vehicle" for
inspiration!

Using recombinant DNA in combination with the newly-discovered [redacted] technology, we can reshape nature itself.

In other words, where other people see a goat, we see endless possibilities.

Behold, our
latest creation...

THE GOATERCYCLE!

...And we've made many other
breakthroughs, as well!

The
Choo-choo-dile

The
Helicopterpus

The dragon...
f... blyplane?
(We couldn't come
up with a good
pun for this one.)

"But this research seems morally ambiguous", you might say.

So why do we do it?

Well, the short answer is because it's cool as hell.

Well...
except for that
time we tried
to combine a
raccoon with a
steamroller...

Admittedly,
that one didn't
turn out as
cool as we'd
hoped.
